

**Assignment:** Over the weekend, add links, images, and a table of information about you to your index page. (Index page meaning the first page of your personal site, which is what you created in the last assignment).

Here's an example of a data table:

**Favorites**

<b>Color</b>	Red
<b>Movie</b>	Lord of the Rings
<b>Video Game</b>	Command and Conquer
<b>Band</b>	Ensiferum

It can follow that format or be any kind of format you want.

Links should lead to your favorite websites, maybe you can hit two birds with one stone and create a table like this:

**Favorite Sites**

Music	<a href="http://last.fm/">http://last.fm/</a>
Play	<a href="http://www.flashplayer.com/">http://www.flashplayer.com/</a>
Movies	<a href="http://www.fandango.com/">http://www.fandango.com/</a>
Games	<a href="http://www.ign.com/">http://www.ign.com/</a>

Feel free to make multiple tables! **Hint:** You can put whatever you want in a table cell... like images!

```
<td></td>
```

Images can be movie posters, band logos, or whatever you think is cool!

Make sure to check the website for reference files I showed in class!
