

```
1 <html>
2 <head>
3   <title>Comments</title>
4 </head>
5 <body>
6
7 <p>HTML comments are very useful. When you have a complicated site, you might forget
  what things are
8 for or why you did something the way you did. HTML comments let you and anyone who is
  reading your
9 HTML code know something.</p>
10
11 <!--   Like, the web browser won't show this... but I can see it when I view source
  code!
12
13   Useful, eh?
14
15   Again, HTML doesn't care about whitespace, so feel free to format however you want
  .
16
17 -->
18
19 </body>
20 </html>
```
