

Name: _____

Assignment: Style your personal website. Follow the conventions I described to you in class and in the presentation. **Please do not do advanced CSS yet, that means you (alleged) HTML know-it-alls.**

REMEMBER TO STAPLE THIS SHEET TO YOUR ASSIGNMENT!

Examples include:

- Changing your webpage font
- Changing the colors. Try not to do bad color combinations. Use the Color Selector.
- Change font sizes.
- Change link look.
- Add borders around things.

The following examples use the attributes only, they can all be applied to different types of tags, including body, p, a, and others.

Here are the attributes how for changing a font:

```
font-size: 15px; font-family: Tahoma; color: purple;
```

Here is how to change colors on a link:

```
a { color: red; }
```

Here is how to use the border attribute:

```
border: 1px solid red;
```

For additional help, ask around first or visit the following CSS reference site:

- http://www.w3schools.com/css/css_reference.asp

To see how I did my styles, visit the class website and look at the source code for the HTML pages.
