

```
1 <html>
2 <head>
3   <title>Inline CSS</title>
4   <style type="text/css">
5
6     p { background: blue; }
7
8   </style>
9 </head>
10 <body>
11
12   <p>An example of using inline CSS is when you need to make something look    ✎
13   different in one place real quick.
14   The CSS on this page is telling every paragraph to be blue, but the one below ✎
15   this is red!</p>
16
17   <p style="background:red;">A second paragraph that is red, using inline CSS.</p>
18 </body>
19 </html>
```
